YOUR COMPLETE ANIMAL CROSSING HAIR GUIDE CITY FOLK: UNLOCKING STYLE IN THE BIG CITY

When you first step off the train into your new life in *Animal Crossing: City Folk* for the Nintendo Wii, your character's appearance is a blank canvas. You are assigned a random face, a basic set of eyes, and a rather unremarkable hairstyle. For many players, the very first question after paying off the initial down payment on their home is often cosmetic: "How can I change my look?" This is where the bustling hub of the city comes into play, offering one of the most satisfying customization features in the game. Understanding the ins and outs of the salon is essential, which is why this **Animal Crossing Hair Guide City Folk** will walk you through every curl, cut, and color option available to make your villager truly your own.

The original *Animal Crossing* games were somewhat limited in personal expression. Your character's hair was tied to your answers to a personality quiz at the very start, and once set, it was difficult to change. *City Folk*, however, took a massive leap forward by introducing a dedicated hair salon in the city area, run

by the beloved poodle stylist, Harriet. This addition provided players with agency over their avatar's identity, making the experience feel much more modern and dynamic. Let's dive deep into everything you need to know to get the perfect look.

Getting to Shampoodle: The Gateway to a New Look

Before you can start flipping through hairstyles, you need to unlock the shop itself. Shampoodle is located upstairs in the main city building, directly across from the Able Sisters tailor shop. However, you cannot simply walk in on Day One. Harriet is a bit of a perfectionist and requires a certain level of "fashion awareness" in your town before she will open her doors for business.

To unlock Shampoodle, you must have completed a specific prerequisite: you need to have spent a total of **8,000 Bells** at the Able Sisters' clothing shop. This isn't just a one-time purchase; it is a cumulative total. You can buy clothes, accessories, umbrellas, and patterns. Every time you buy a shirt, a hat, or even a pair of socks, the total adds up. Once you cross that threshold, Kicks (the skunk who runs the shoe shop) will tell you

that Harriet is ready to set up shop. The next day, the previously locked door upstairs in the city building will be open, revealing the bright interior of Shampoodle.

This requirement cleverly ensures that players have engaged with the game's fashion system before diving into hair customization. It makes the moment you finally sit in Harriet's chair feel like a reward for being a good consumer in the village economy.

What Does Harriet Offer? A Breakdown of Services

Once inside Shampoodle, you will be greeted by Harriet's cheerful demeanor. She offers two distinct services, which form the core of this **Animal Crossing Hair Guide City Folk**. You cannot get a haircut without getting your face done, and vice versa, though the process is intertwined.

1. Face Customization (The Mii Question)

This is the most controversial aspect of the salon. When you first visit Harriet, she will ask if you want to use your **Mii face** as the basis for your villager's face. If you say "Yes," your character's eyes, nose, and mouth will be replaced by the features of the Mii you have loaded on your Wii Remote. This was a quirky attempt by Nintendo to blend the Mii craze of the Wii era with the *Animal Crossing* universe. However, many players found that Mii faces looked out of place in the soft, expressive world of the game.

If you say "No," Harriet will style your hair while keeping your

current facial features. Crucially, you **cannot** choose a specific face shape or eye type from a menu in this game. Your face is determined either by your original starting appearance or by your Mii. This is a very different system from later games like *New Leaf* or *New Horizons*, which offer much more granular control. For the purpose of this guide, sticking with your original face or using a specifically designed Mii is the best path forward.

2. Hair Styling (The Core Mechanic)

The main event is the haircut. Your character will sit in the chair, and Harriet will present you with a selection of different hairstyles. It is not a full grid of every option; instead, she offers a rotating set. You can cycle through the available styles until you find one you like. The cost for a full service (face and hair) is **3,000 Bells**.

Available Hairstyles in City Folk

The hair options in *City Folk* are gender-neutral. Unlike the original *Animal Crossing* for the GameCube, where hairstyles were strictly assigned to male or female characters, *City Folk* allows anyone to wear any style. This was a fantastic move for inclusivity and creative expression. There are **12 distinct hairstyles** available in the base game.

Here is a complete list of the hairstyles you can unlock and choose from at Shampoodle:

- **Classic Bob:** A clean, straight cut that falls just above the shoulders. It is tidy and elegant.
- **Wavy Bob:** Similar to the classic bob but with gentle waves, offering a softer, more casual look.
- **Pigtails:** Two ponytails high on the sides of the head. This style is often considered youthful or sporty.
- **Ponytail:** A single high ponytail that swings as you walk. It is a versatile and popular choice.
- **Short Spiky:** Short hair with spikes pointing upwards. A bold, energetic look suitable for any villager.
- **Messy:** A deliberately unkempt look with tufts of hair sticking out. Perfect for a lazy or carefree character.
- **Dreadlocks:** Long, rope-like strands of hair gathered at the back. A distinct and stylish option.
- **Male Model:** A polished, slicked-back style often associated with formal wear.
- **Slicked Back:** Similar to the male model but slightly less formal, with a wet-look finish.
- **Bangs:** A simple cut with straight bangs across the forehead and medium length in the back.
- **Afro:** A large, rounded, voluminous hairstyle. It stands out significantly among other styles.
- **Pageboy:** A classic, bowl-cut style that is neat and symmetrical.

It is important to note that there are no "special" hairstyles unlocked via in-game events in *City Folk*. What you see is what you get. However, the variety is enough to ensure every player can find a look that fits their personality. This **Animal Crossing**

Hair Guide City Folk recommends trying each style briefly to see how it moves. Your character's hair will sway and bounce differently depending on the design.

The Complex World of Hair Color

Hairstyle is only half the battle. The color of your hair is equally important for defining your character. In *City Folk*, hair color is not a simple picker. It is tied directly to the **color of your roof**.

Yes, you read that correctly. If you visit Harriet after changing the color of your house's roof, she will offer you a different set of hair color options. This is one of the most unique (and sometimes frustrating) mechanics in the game. To change your roof color, you must talk to Tom Nook or look at the "Exterior" options at the Nookington's store.

Here is a breakdown of the roof colors and the general hair colors they unlock:

- **Black Roof:** Very Dark Brown, Black, Dark Blue, Deep Purple.
- **Red Roof:** Bright Red, Orange, Auburn, Maroon.
- **Blue Roof:** Standard Blue, Light Blue, Teal, Navy.
- **Green Roof:** Standard Green, Lime Green, Dark Green, Olive.
- **Brown Roof:** Brown, Light Brown, Chestnut, Sandy Blonde.
- **White Roof:** Blonde, Platinum Blonde, Light Gray, White.

- **Yellow Roof:** Bright Yellow, Gold, Pastel Yellow, Pale Orange.
- **Pink Roof:** Pink, Hot Pink, Magenta, Rose.
- **Purple Roof:** Purple, Violet, Indigo, Lavender.

This system means that if you want bright pink hair, you must have a pink roof. If you want platinum blonde, you need a white roof. Changing your hair color essentially requires you to pay Tom Nook to renovate your house exterior. This adds a significant cost to the customization process (renovations cost between 5,000 and 50,000 Bells depending on the upgrade), but it also gives your house a coordinated look. It is a clever, if restrictive, design choice that ties your personal style to your property.

Tips and Tricks for Master Stylists

Now that you know the basics, here are some expert tips to make the most of your salon visits, ensuring this **Animal Crossing Hair Guide City Folk** is as useful as possible.

1. Use a Dedicated Mii for Your Face.

While Mii faces can look odd, they are the only way to change your facial features. If you dislike the eyes or mouth your character started with, create a Mii on your Wii system that has features you prefer. Upload that Mii to your remote before visiting Harriet. You can craft a Mii with a neutral expression or specific eye shapes to better fit the *Animal Crossing* aesthetic. It takes

some trial and error, but it is the only workaround for face customization.

2. Plan Your House Exterior First.

Before you visit Shampoodle, decide on your hair color. Go to Tom Nook and upgrade your house to a size that allows roof color changes (this usually requires the second floor or a specific expansion). Then, choose the roof color that corresponds to the hair color you want. This saves you the disappointment of sitting in the chair and realizing the shade you want is unavailable.

3. You Can Visit Multiple Times.

You are not locked into a single style forever. You can visit Harriet as many times as you like, as long as you have the Bells and the patience. This allows you to change your hair with the seasons, for special holidays, or just because you are bored. The only limiting factor is the 3,000 Bell fee each time.

4. Consider the Hats and Accessories.

The hairstyles in *City Folk* interact differently with hats. For example, a large Afro will clip through many hats, while a short ponytail will allow a cap to sit naturally. When choosing your hairstyle, think about the accessories you plan to wear. If you love the Straw Hat, a short hairstyle or a pageboy cut will look much better than a massive spiky or voluminous style.

5. The "Unchanged" Style.

If you are happy with your current hair texture but just want a new color, you can select the same hairstyle again. Harriet will still cut it, but the result will be the same shape with the new color applied. This is the most efficient way to simply change your hair dye without altering the cut.

Troubleshooting Common Hair Problems

Even the best stylist runs into snags. Here are some common issues players face when getting their hair done in *City Folk*.

Problem: I paid 3,000 Bells but my hair looks the same!

Solution: You likely clicked through the style selection too quickly, or you chose the exact same style and color you already had. The game will take your money regardless. Slow down and ensure you are picking a different option on the row. Look for the arrows that cycle through styles.

Problem:
